

# TIPS TO MOVE FROM FORMING TO STORMING

01

Name what you see going on, the stage you are in.

02

Present the team's purpose and an overview of project goals and the journey ahead.

03

Communicate roles and responsibilities among the team members.

04

Be clear about your vision for the team, its outcomes, and behaviours.

05

Be transparent and share information.

06

Set the expectation that asking questions is needed, even the “dumb” questions.

07

Use lots of visual materials in the form of presentations, charts, and infographics.
